Title of the project:

How Phosphorus-Containing Food Additives Affect the Gut and Metabolic Health of the Body: Having the Guts to Tackle Phosphates

Competition: OPUS 25

PI: dr hab. Adam Jurgoński

Project description

Description of the position:

The main aim of this project is to verify, by using strictly designed diets, how the most frequently used phosphorus-containing food additives affect the gut and metabolic health of the body. The realization of this project will help in determining what is the role of these food additives in health and disease and in verifying safe dietary levels and hazards resulting from their regular consumption. The planned research will also help explain the mechanisms by which the tested additives affect the gut and metabolic health of the body.

The candidate will participate in the following research tasks:

1. Assistance in planning and conducting feeding experiments on laboratory rats as a research model
2. Assistance in collecting biological material for analysis.
3. Analysis of the obtained biological material using various techniques, including those related to molecular biology, immunology and microbiology.
4. Collection, analysis and interpretation of the obtained results.
5. Popularization of the obtained results by participating in: writing scientific articles, scientific conferences, popular science activities.
6. Preparation and defense of a doctoral thesis.

Requirements:

1. A master's degree in a field related to food and nutrition, biology and medical biology, biotechnology, pharmacy or other related fields (expected before the deadline of this application);
2. High motivation to work in a multidisciplinary team dealing with nutritional and biomedical research;
3. Basic knowledge of physiology and biochemistry;
4. Fluent knowledge of English (spoken and written);
5. Ability to share knowledge in written and oral form;
6. Availability, good work organization, ability to work in a team and to cope with stress;
7. Additional advantages: knowledge in the field of food and nutrition sciences, scientific activity during higher education and experience in the analysis of biological material.

Recruitment process:

- Applications will be assessed in accordance with the criteria set out in the regulations for awarding research scholarships in research projects financed by the National Science;
- Only on-line applications will be considered;
- Candidates evaluated with the highest score will be invited to an actual interview, which will take place face-to-face or online;
- During the interview, the candidate will be asked to deliver a 10-minute speech. presenting his/her Master thesis and research interests;
- Final results of the recruitment will be published on IAR&FR PAS webpage within 10 days after final decision.

Important information:

- **Application deadline: Sep 2nd, 2024, 23:59 (Eastern European Time)**
- **Application method:** application form
- **Interviews: 9-13.09.2024**
- **Location: Olsztyn, Poland**
- **Duration of the scholarship: 48 months**
- **Date of position opening: Octoberst, 2024**
- **Number of positions: 1**
